What is Box Design S2?

Pro-Ject Audio Systems was founded in 1991 with the vision to design and build high-quality record players for a reasonable price. Since the very beginning, our philosophy has been to design products in a functional manner and to omit unnecessary buttons or features. Sound quality first is our dedication! The aesthetic of Pro-Ject products is driven by their purpose and interface so the user can concentrate on the essential:

Experience music with all of your senses.

We designed a completely new and revolutionary range of high-end electronic

micro components, engineered and manufactured according to the same principles as our acclaimed turntables.

The S2 line, introduced in 2017, is a series of amplifiers, sources and accessory components. The idea is to make the devices as small as possible, but still have a breathtaking sound performance.

The interior of the S2 line is based on the latest state-of-the-art electronic components, manufactured to the highest standards and built with absolute precision. The full aluminum housing in silver or black provides a high-end look, that has never been produced at this price-level.

Why Box Design S2?

The S2 line is the perfect entry-point into the real hifi stereo world. We designed the S2 line and every other Box Design line, as a modular product range. That means you can customize your music system with the components you really need. Traditional hifi systems tend to put everything in one box, with the result that the quality of each element is average. On top of that, these systems are mostly overloaded with features and therefore complicated to use.

Another big advantage of the S2 line is if one feature is getting outdated, you simply replace that single component and not the whole system.

Its ultra compact and minimal design allows you to place it almost everywhere which is a big improvement to the bulky hifi components of the past.

S2 is the basis for a true hifi stereo experience for a similar price as standard audio products. The majority of them use one-box-speaker-systems. These systems might technically be stereo in principal, but the speakers are built so close together that the actual result for the listener is mono. With these systems you will never get the same live music experience you will get with even the most basic S2 set...

Hifi Stereo Set S2

The easiest way of getting a real hifi stereo image.

HiFi Stereo Set S2

This simple and elegant micro system is for everyone who wishes to enjoy their favorite music in higher quality. You can connect any available source to Stereo Box S2 BT via its analogue RCA line inputs or stream wireless audio to its Bluetooth receiver.

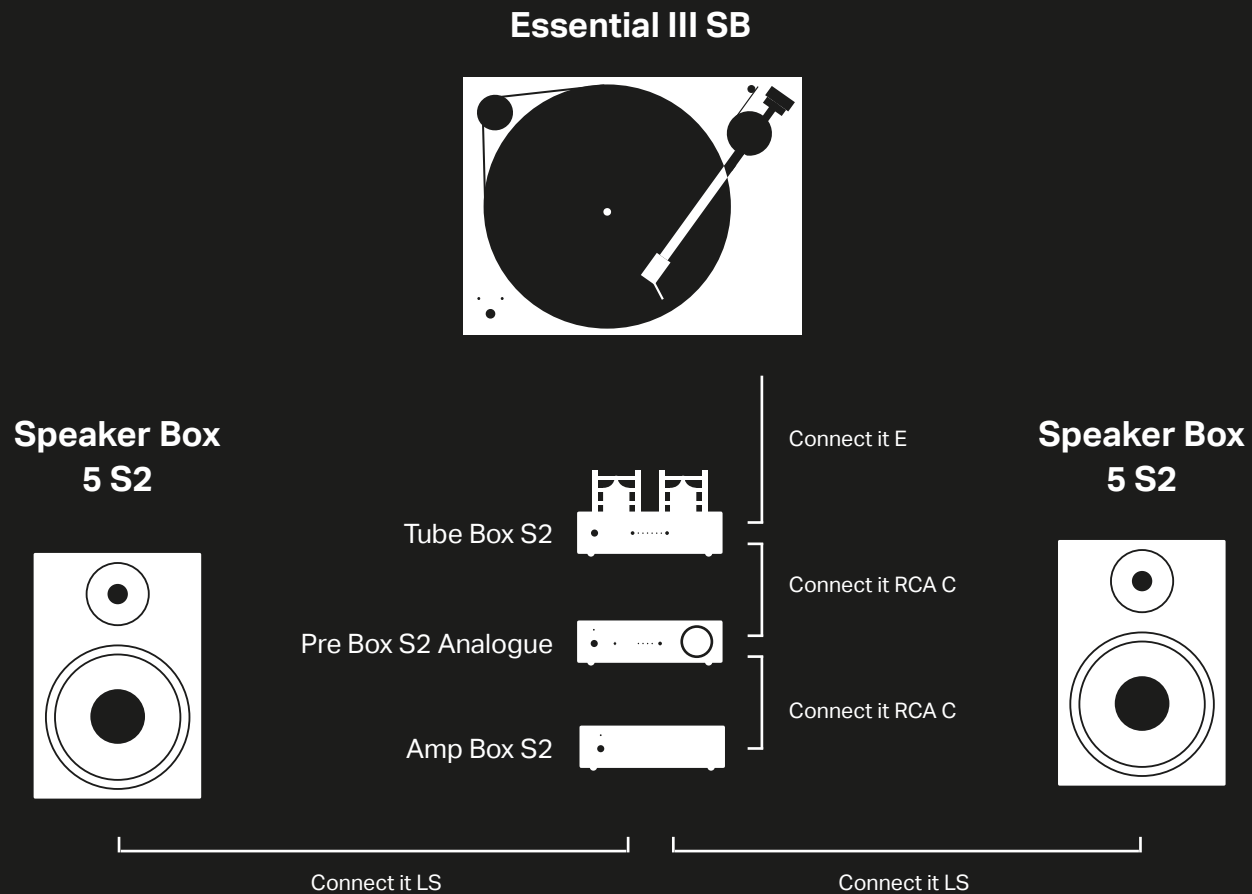

The budget friendly and audiophile bookshelf speakers, Speaker Box 5 S2, offer outstanding value for money. HiFi Stereo Set S2 is the perfect entry into the real stereo experience.

While today's popular speaker solutions only offer an unsatisfying mono sound, you will get a full stereo image with our Speaker Box 5 S2 and Stereo Box S2 BT set. Due to its size it fits in almost every livingroom interior. Our electronics and speakers are durable, of a high quality and have an impressive sound. Both products are handmade in Europe!

Analogue Hifi Stereo Set S2

Enjoy analogue audio to its fullest.

Analogue HiFi Stereo Set S2

The Analogue HiFi Stereo S2 Set is for the pure analogue audio fan. It consists of class leading products such as the Tube Box S2, which is a fully discreet tube phono pre-amplifier. It is known for its full and immersive sound.

The Pre Box S2 Analogue offers multiple line level inputs, to which many analogue sources can be connected. As source we chose to use the Essential III SB, an entry-level audiophile's dream.

The power amplifier, Amp Box S2, offers room-filling sound and enough power

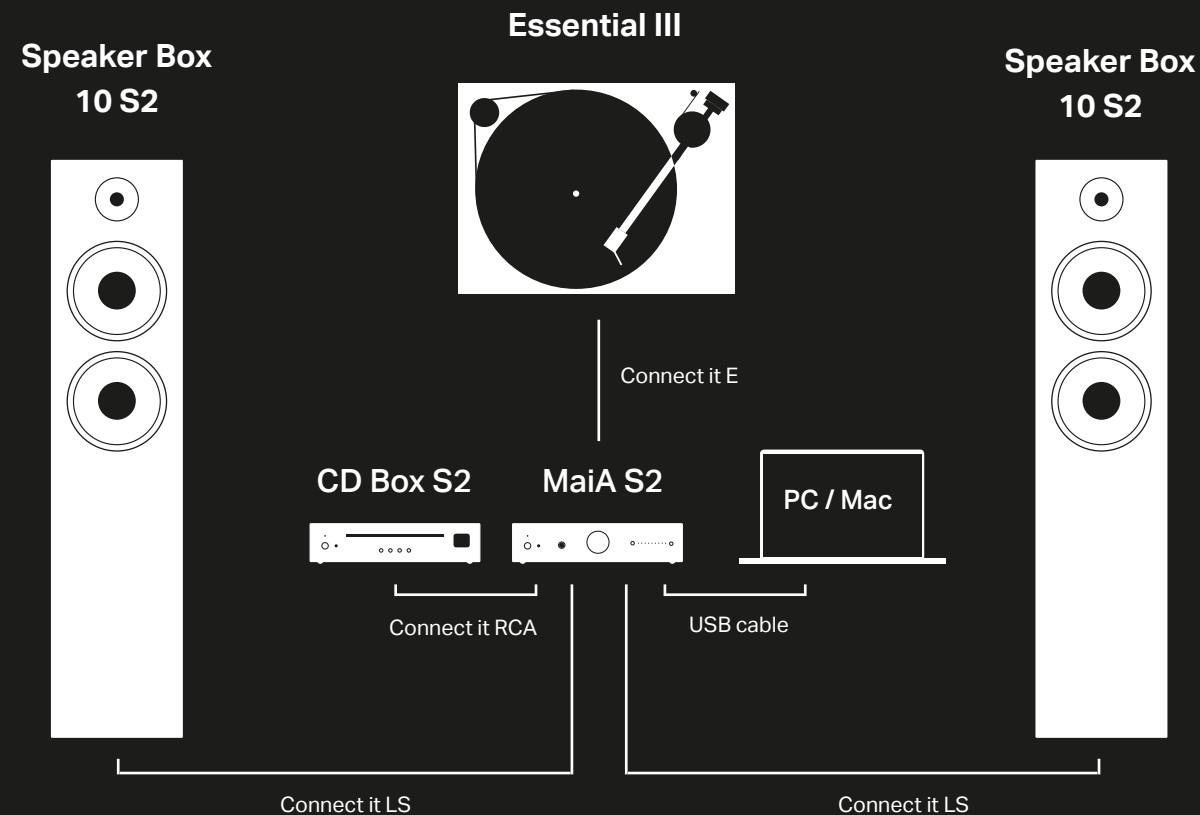

to drive Speaker Box 5 S2 to its summit. The entire set is made to enjoy analogue audio to its fullest.

You can further enhance this set by adding standalone power supplies, like Power Box S2, or you could add a digital to analogue converter, such as the DAC Box S2+, to add a little digital flexibility. With DAC Box S2+ you can also connect other sources, like your TV, a CD player or a computer to the system.

Ultimate Hifi Stereo Set S2

Made to enjoy the best of both worlds, analogue and digital.

Ultimate Hifi Stereo Set S2

This all-rounder set is for everyone who wants to enjoy the best of both worlds, analogue and digital. The heart of this system is our integrated amplifier, the MaiA S2. The MaiA S2 is equipped to handle all digital and analogue HiFi-playback devices you can think of. Connect your Essential III turntable to the built-in phono stage and enjoy your vinyl played back with ultimate accuracy.

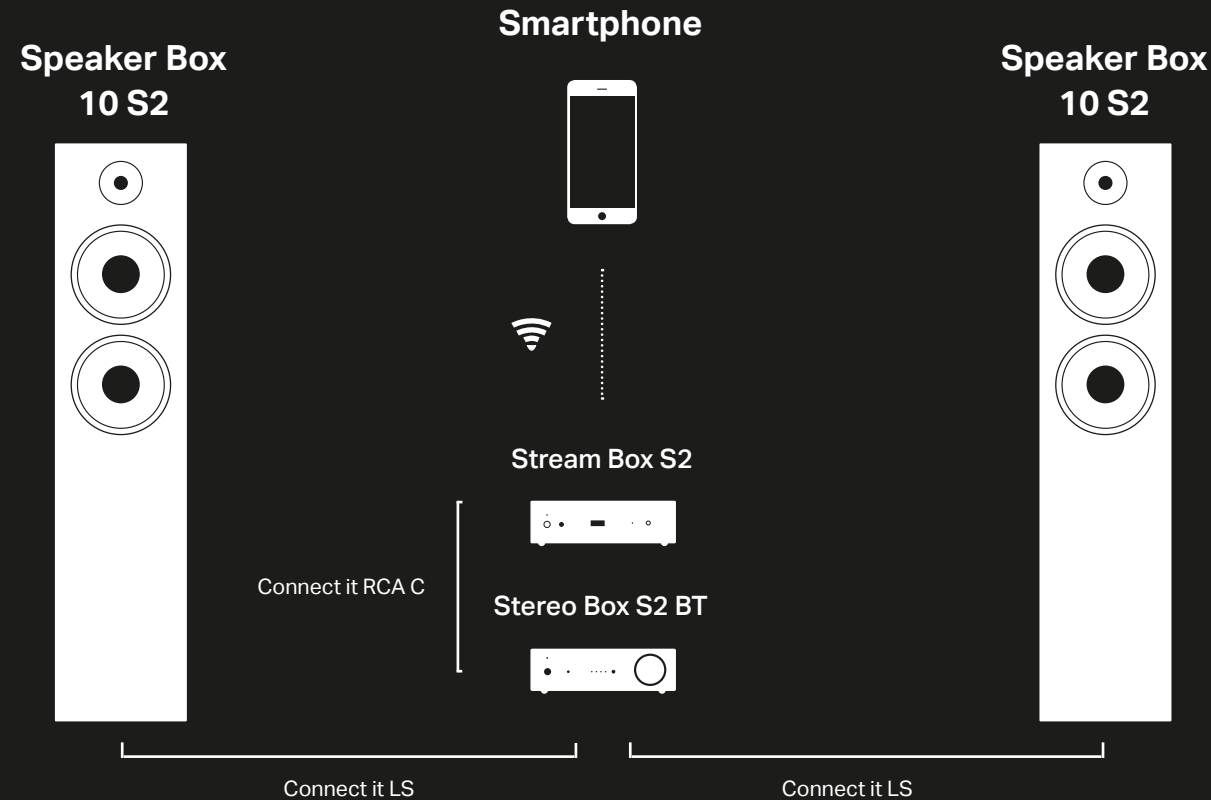

Adding our ultra-compact CD Box S2 for audiophile CD playback opens up the other end of the spectrum by offering a pristine digital music experience. Digital optical, coaxial and USB inputs enable

this setup to be integrated into any living room, providing all the connectivity needed for TVs, Laptops, Blu-Ray Disc players or video game consoles. Our floor standing speakers, Speaker Box 10 S2, are made in Europe and offer a top-quality sound. All components used are audiophile grade and are sure to deliver sonic bliss. To further improve sound quality, you can use the optional power supply Power Box MaiA for the MaiA S2, CD Box S2 and the Essential III turntable. This way you will unlock the full potential of all products.

Streaming Set S2

Experience a marvelously sounding streaming system.

Streaming Set S2

This set forms the compact and easy solution to get all your digitally streamed music delivered to high-quality stereo speakers. If you are used to streaming your favorite music on your phone, this simple setup will let you appreciate your music in a completely new way. The Stream Box S2 allows you to access online streaming services like Spotify and TIDAL and control them comfortably from your phone. Music saved locally on your phone is transmitted via WiFi, which avoids a loss of sound quality, often associated with regular Bluetooth connections. In combination with the Stereo Box S2 BT you can properly drive

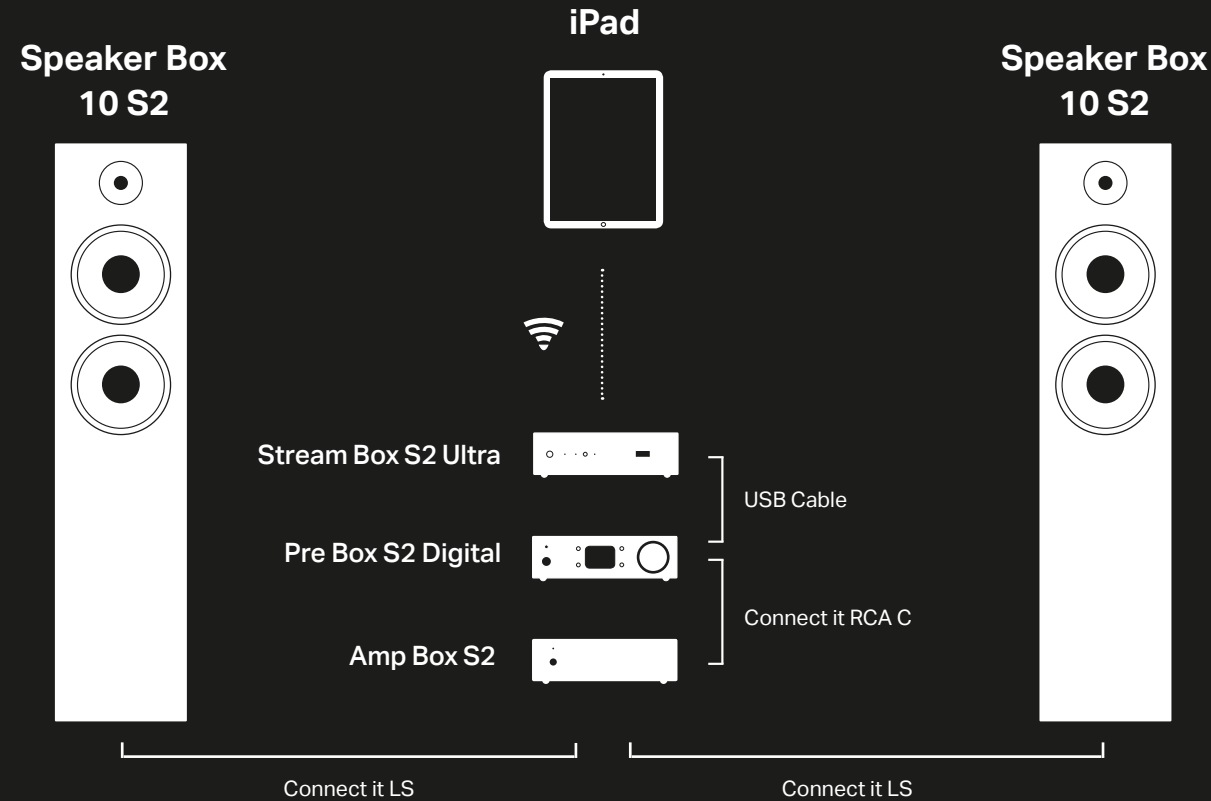

our floor standing speakers, the Speaker Box 10 S2. If you want a quick Bluetooth connection for your mobile devices, the Stereo Box S2 BT is also able to do just that.

This combination - excellent speakers, a small yet powerful amplifier, and a marvelously sounding streaming device - allows you to experience all the finest details and nuances in your music and involve yourself in an ultra-immersive stereo soundstage.

High End DAC & Streaming Set S2

The best streaming experience ever. For all demands.

High End DAC & Streaming Set S2

The heart of this set is our EISA Award winning Stream Box S2 Ultra. With it, we have designed a completely new product in the streaming world. It features never seen control scenarios and unprecedented audio performance. Its main goal is to be a universal device that can get any USB DAC into the network, upgrading your favourite high-end DAC with modern and future proof streaming capabilities.

The Stream Box S2 acts as a pure transport, fulfilling this job to its very best. Together with Pre Box S2 Digital, this set supports resolutions up to the highest forms such as MQA and DSD. It is a safe, future proof solution, completely unique

in this price-range. The Stream Box S2 Ultra powers the DAC via USB and acts as a clean power supply. Control the Stream Box via App, Roon or Webbrowser and seamlessly switch between Streaming services like TIDAL or Spotify. Activate Shairport or Bluetooth to connect mobile devices.

Adding an Amp Box S2 and a pair of speakers, this incredibly small set provides all the digital audio and streaming features any modern living room needs and will future-proof it for years to come.

High End Headphone Set S2

Experience high end audio performance for a reasonable price.

High End Headphone S2 Set

This set contains multi award winning components. The Pre Box S2 Digital has been chosen as DAC of the year by prestigious EISA HiFi critics all over the world. Its performance is enhanced even further with the dedicated battery driven power supply Accu Box S2. Partnered with one of the most awarded headphones in the recent past, the Meze 99 Classic, you will experience cost-effective audio-perfection.

The High End Headphone S2 Set is for everyone looking to enhance their music experience to high levels, but who is not willing to spend a big amount of money. This set will convince every

growing and existing enthusiast. With support for highest resolution files, Pre Box S2 Digital is set to be future proof and will be the heart of your micro hifi system for years to come.

You can connect up to three different digital sources to your Pre Box S2 Digital. Those can be Laptops, Personal Computers, TVs, CD players and many more electronics. If you want to take this setup to the next sonic-level, you might consider adding a power amplifier, such as Amp Box S2, and a pair of speakers to it. This way you can also enjoy your favorite artists in a room filling way with better stereo imaging.

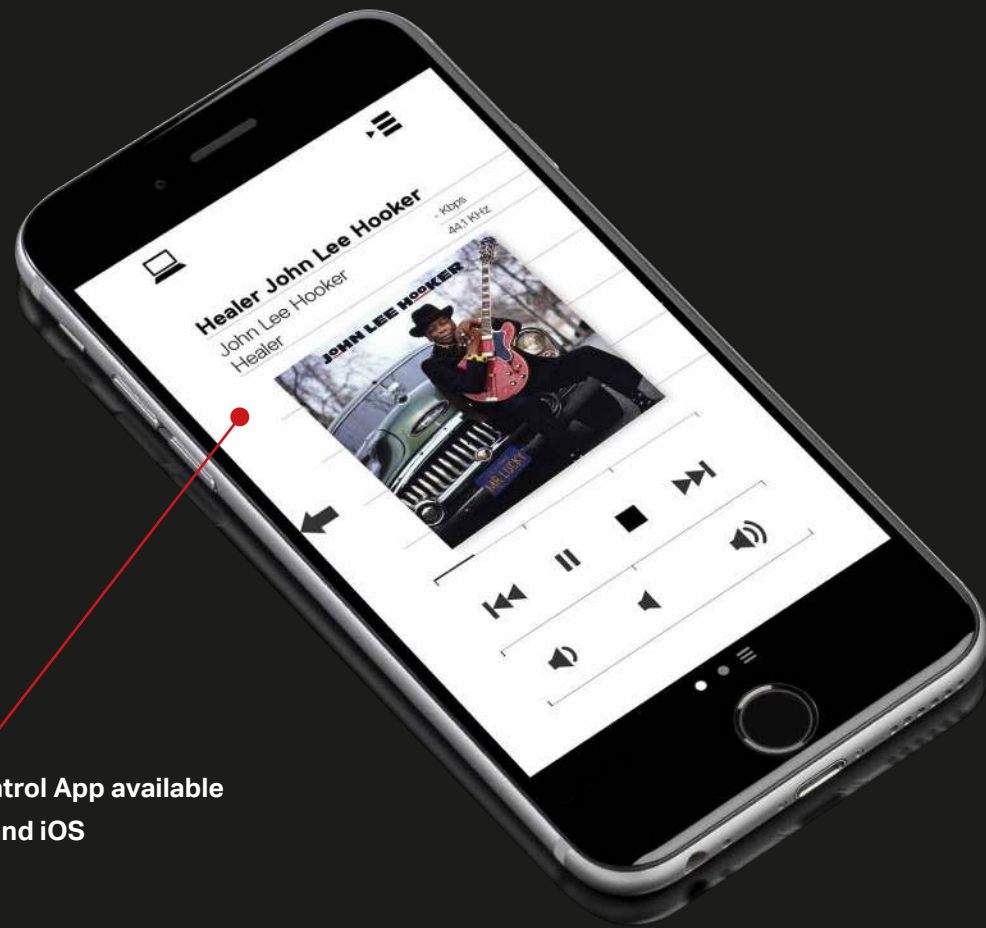

Control it Pre Box S2 Digital

A luxurious remote control which not only controls your hardware but also your software.

Made of the same high quality
aluminum as all S2 components

Free Box Control App available
for Android and iOS

Remote Box S2

Add Remote Box S2 to your setup, pair it with your smartphone and control your entire system.

Term definitions

Pre Amplifier

Device to connect and switch analogue and/or digital sources. Amplifies the signal for a power amplifier which drives the speakers.

Integrated Amplifier

Combines pre and power amplifier in one device.

Power Amplifier

Amplifies the signal from the pre amplifier to power and drive the speakers.

Headphone Amplifier

Amplifies signals to power and drives headphones. Some integrated / pre amplifiers and DACs have a headphone amplifier built in.

Phono Pre Amplifier

Device to connect a turntable to a pre amplifier, integrated amplifier or any other audio device like Dolby Surround receivers which do not have a built in phono pre amplifier. Amplifies and equalizes the phono signal to a standard line signal. Some

phono amplifiers also create a digital output which is used for digital recordings.

D/A Converter

Device to connect and switch digital sources. Converts a digital signal to an analogue one.

Bluetooth

Receives music from a Bluetooth capable device - wireless music streaming from your mobile phone. A quick and easy way to get music from Spotify, TIDAL or Apple Music from your phone to your hifi system.

Power Supplies

An upgrade to the standard power supplies. Cleans power from the mains by filtering interferences, which leads to even better state-of-the-art sound quality. Some power supplies are able to power multiple Box Design products and allow an elegant single power cable solution.

Some S2 components are listed more than once because they feature more than one main function.
