

Tube Box DS3 B

Dual mono balanced tube phono preamp

Continuously input impedance loading

Made in Europe!

Balanced XLR in- and outputs

Available in black and silver

We are happy to introduce the Tube Box DS3 B as our newest phono preamplifier addition.

The Tube Boxes have been an integral part of our product portfolio for many years. Now, the new Tube Box DS3 B adds balanced in- and outputs to the beloved tube amplification. Connect your turntable either with the 5-pin mini XLR cable or standard XLR cables & profit from the balanced signal transmission.

We also extended the loading options to be able to match your cartridge even more precisely. Load impedance can be set continuously via the potentiometer, a system invented by Pro-Ject Audio Systems. It allows you to seamlessly adjust the impedance during playback and immediately assess the impact of different loading options.

Available for MSRP 1049 € (incl. VAT).

At Pro-Ject dealers in November 2023.
